

**Prime Minister Sapar Isakov took part in the opening ceremony of  
operation "Bhabhatron II"**

26 February, 2018

The Prime Minister of the Kyrgyz Republic Sapar Isakov today, February 26, took part in the opening ceremony of the gamma-therapeutic apparatus "Bhabhatron II" at the National Center of Oncology and Hematology under the Ministry of Health of the Kyrgyz Republic.

In his speech, the Prime Minister expressed his gratitude to the Indian government in the person of Ambassador Extraordinary and Plenipotentiary of the Republic of India in the Kyrgyz Republic Lakshmanan Savithri for the timely assistance in installation of the above medical apparatus.

The Prime Minister noted with regret that today in the Republic oncological diseases are one of the most widespread.

Sapar Isakov emphasized that use of the device "Bhabhatron II", which is the latest medical equipment, will significantly improve availability and efficiency of medical services and reduce morbidity and mortality from cancer.

The head of Government reminded that during his recent meeting with Prime Minister Narendra Modi in the framework of the Sixth World Summit of Governments in Dubai (UAE) the possibility of releasing a new apparatus "Bhabhatron II" for the needs of cancer clinics in the city of Osh was discussed. According to him, the Government is also planning to carry out capital reconstruction in medical institution of Osh city.

Prime Minister also noted that within the framework of the signed Strategic Agreement on environmental protection and investment development between the government of the Kyrgyz Republic and Centerra Gold Inc. tender procedures for the purchase of linear accelerator and other modern medical equipment are carried out.

In turn, Ambassador of India in Kyrgyzstan Lakshmanan Savithri stressed that the device "Bhabhatron II" is a symbol of friendship between the two peoples.
